

NEW FLOODLIGHT MAX LUMINAIRES

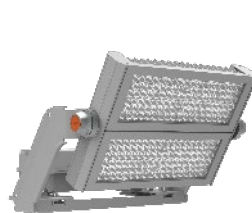

FLOODLIGHT MAX

With up to more than 160 000 lumens, our new FLOODLIGHT MAX range ensure optimal lighting for large areas and sports facilities. Four light distribution alternatives and three power levels give the best possible result in a wide variety of applications. The luminaire head and power supply unit are packed separately for easier transport to their place of use. The connection is made by a few simple steps thanks to plug-and-play. Through optional 2-phase control, the output and illuminance can be reduced easily and efficiently.

TECHNICAL FEATURES

- Efficacy: up to 137 lm/W
- Light color: 5700K, CRI >70
- White aluminum housing (similar RAL 9006)
- 4 beam angles: rotational symmetric 10°, 30°, 60° and asymmetric 50°x110°
- Lifespan: up to 70,000 hours (L80/B10 @ 25°C)
- Guarantee: 5 years
- Very versatile and stable bracket, suitable for single screw installation
- Switching of module groups for easy dimming
- Membranes to prevent condensation
- 10 kV (L/N-PE), 6kV (L/N) surge protection

600 W

900 W

1200 W
